

Appl. No. 10/782,342
Amdt. dated December 22, 2005
Reply to Office action of September 26, 2005

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-4. (cancelled)

5. (currently amended) In an assembly including a fluid coupling, a prime mover for driving said fluid coupling, a rotating comminuting machine, a power train between said fluid coupling and said rotating comminuting machine, and a conveyor for feeding material to said comminuting machine, said fluid coupling having an impeller and a runner, said runner being fastened to an output shaft, said conveyor being driven at a substantially constant speed, the improvement comprising means mounted on said output shaft responsive to a change in speed of rotation of said output shaft, and means responsive to a ~~predetermine~~ predetermined amount of slow-down of said output shaft for reversing the direction of said conveyor for a predetermined length of time and restoring the original direction after said length of time.
